... a touch of intimacy.
Create a pleasant environment both by day and night. Interior roller blinds will protect you from the glare of street lamps at night and perfectly screen out sharp sunlight in the daytime. Choose from many possibilities of classic roller blinds over the modern design up to timeless design of day night products with never-ending fabric.

Whether you choose a fully obscuring material or material partially transmitting light, you will always get an elegant and a fully functional complement to your interior which will enhance the atmosphere of your home.

ADVANTAGES AND BENEFITS OF FABRIC ROLLER BLINDS

- Design variability and diverse mounting options.
- Aluminium or plastic guidance bars preventing the penetration of light at the sides.
- Chain or motor control.
- Novelty: Day-night fabric version.

ISOTRA Quality

A brand symbolizing years of tradition, innumerable investments into research and development, use of high-quality materials, technological advancement, reliable work of hundreds of employees and many more parameters, which together form one whole — the final product of company ISOTRA.
Home is a place where we want to feel safe and experience our intimate moments of privacy. The design of the roller blind Larra expresses these feelings with its naturally rounded and wavy shapes that we most often see in nature and modern architecture. Larra presents a timeless design that, combined with your chosen fabric, will make you feel comfortable in the interior and create a cozy atmosphere of your home.

Versatility of this roller blind lies in the option of five shapes of the lower slat and five options of the upper profile - attachment by means of brackets/holders, mounting brackets or a cover box.

The aesthetic look of the interior roller blind Larra from the ISOTRA workshop was created by Miroslavo. Miroslavo is a Czech designer, photographer and artist, known for his never-ending curiosity and feverish inventive imagination. He is the holder of several world awards for design and his work is exhibited all over the world.

Upper profile

Lower profile
Decorate your windows with various motifs, harmonise the interior with your favourite colour, experiment with light penetrating the semi-brightened fabric, or shade your windows in full.

Easy controlling and inspired design – the Verra is an ideal roller blind for plastic windows, Euro windows and other window types. You can choose from a large selection of fabrics: from simple colour tones to fabrics with luxurious patterns, from curtain cloths to black-out fabrics. Due to the high-quality manufacturing and wide selection of fabrics, the Verra roller blind will give your interior a specific charm.
Advantages and benefits

- Simple design,
- wide colour range of fabrics used,
- easy handling and assembly,
- possibility of choice of fabric day – night,
- bottom rail is possible to cover by fabric.

Control

- PVC, Metal
- Switch
- Remote control

Installation options

The roller blind Verra can be mounted on the casement, wall or ceiling using the side brackets.

A truly modern interior needs the Verra Metal! Due to its ability to shade very large areas (up to 17.5 m²), this roller blind is predestined to complete the architectural design of any interior – private areas as well as large administrative and exhibition buildings.

Thanks to its all-metal design, the Verra Metal will become a true jewel of any interior, fulfilling all requirements for shading – both aesthetic and functional. Steel cable guide system can be added to large dimensions. The variability of controls is an indisputable advantage of this roller blind – in addition to manual controls by a metal chain, we also offer motor-driven blind control system activated by a switch or a remote controller. Moreover, three sizes of the winding roller diameters allow expanding the standard selection of fabrics by the screen-type fabrics.
Advantages and benefits

- Modern design,
- wide colour range of fabrics used,
- easy handling and assembly,
- recommended for shading of large areas (up to 17.5 m²),
- variation with traditional, day-night fabric or screen fabric,
- possibility of side guidance by a wire,
- possibility of electric control,
- possibility of choice of fabric day – night,
- bottom rail is possible to cover by fabric.

Control

The Verra semi roller blind with a cover rail elegantly conceals the supporting and control elements that will no longer interfere with your interior design. The classic version offers you a wide range of colours of the fabrics, from simple colour tones to fabrics with luxurious ornaments. Or you can select the modern day-night version.

The day-night version consists in breaking up the fabric into transparent and non-transparent stripes. By overlapping of the two layers of the fabric, the stripes cross-fade, thus allowing continuous regulation of the light intensity that enters the room. The day-night version uses special fabrics without ornaments, which do not interfere with the originality of the roller blind’s stripe finish.
Advantages and benefits

- Modern design,
- supporting and control elements do not interfere with the interior design,
- wide range of colours of the fabrics,
- version with a classic fabric or with a day-night fabric,
- easy installation and handling.

Control

PVC, Metal Switch Remote control

Installation options

The roller blind is attached to the holders (clips) supplied with the blind. The clips can be used for the wall as well as ceiling installation.

The Interior roller blind Rollite represents an elegant and fully functional interior complement. This roller blind cover with a rounded cover profile made of anodized aluminium and lateral guidance bars ensures perfect shading.

You may select fully obscuring, patterned or uni-coloured fabric or a textile material transmitting light just partly. We also supply special textiles containing glass fibres which are particularly suitable for allergic persons as well as special fire-resistant fabrics.
Advantages and benefits

- Blind with an aluminium cover profile,
- aluminium guidance bars prevent the penetration of light at the sides,
- wide colour range of fabrics used,
- profiles and bars in six RAL colour shades.

Control

Installation options

The roller blind Rollite is mounted directly on the casement.

The dimensions in the table are valid both for the lightest fabric weighing up to 170 g/m², and the heaviest fabric weighing from 261 g/m² to 365 g/m².
Would you like to integrate both functionality and design and have only the light that you actually need in a room? The Luna roller blind connects practicality and elegance. Its design with guiding channels on the sides ensures complete shading.

You can choose from a wide selection of fabrics for this roller blind, from simple colour tones to fabrics with luxurious patterns. Correct fabric selection will allow achieving various degrees of shading, from delicate light toning to full shading by black-out fabric types. The original appearance of the Luna roller blind can be supported by toning the blind with the window through decorating the rails into wood imitation. It full harmonises with the window frame, giving a pleasant and exclusive impression.
Advantages and benefits

- Roller blind with a cover profile in aluminium or plastic design,
- lateral guidance bars prevent the penetration of light at the sides,
- possibility of coating the profiles and bars with renolit in imitation of wood.

Control

Installation options

The roller blind Luna is mounted directly on the casement.

The dimensions in the table are valid both for the lightest fabric weighing up to 170 g/m², and the heaviest fabric weighing from 261 g/m² to 365 g/m².
The fabric roller blind Nemo offers you a smooth control together with impressive decoration of your interior. Nemo is a novelty among roller blinds. Its originality consists in the horizontal division of fabric into transparent and non-transparent stripes that alternate periodically. Overlapping of two fabric layers leads to stripe blending and thus to a gradual light transmitting. From a design perspective, the roller blind in its day-night version provides an unprecedented appearance suited to the classical as well as modern interior. Nemo roller blinds can be mounted onto the wall, into the ceiling or, without any drilling, on the casement.

**Table:**

<table>

Day-night fabric version.

PARTIAL SHADING

TOTAL SHADING
The fabric roller blind Sunlite provides a mysterious atmosphere, pleasant feeling and intimate touch for your interior. A uniqueness of the Sunlite blind consists in the possibility of adding a LED light located in the upper decorative strip which – in combination with a selected fabric – will transform your interior fabulously.

You may choose uni-coloured or patterned fabrics with fully obscuring effects or textile materials that transmit light just partly. The variability of this blind is done by the option to choose from two shapes of the upper decorative strip which can be round or flat. A practical shielding element in daylight or decorative complement and beauty in every detail at dusk – this is the roller blind Sunlite.

<table>

The dimensions in the table are valid for the lightest fabric weighing up to 170 g/m². The dimensions in the brackets are valid for the heaviest fabric weighing from 261 g/m² to 365 g/m².
Advantages and benefits

- Luxurious interior complement,
- Modern design,
- Two design options – decorative round or flat strip,
- LED light located in the upper bar,
- Possibility to control light intensity,
- Easy installation into the ceiling or onto the wall.

Control

- Metal/PVC
- Motor (max. width 3000 mm, max. height 2830 mm)

Installation options

The roller blind Sunlite can be mounted on the casement, wall or ceiling.

Design options

- Decorative round strip
- Decorative flat strip

LED light located in the upper bar

Into the upper bar, it is possible to integrate a LED strip emitting white or colour RGB light; the intensity of which can be arbitrarily controlled. The optional accessories are used for regulation of intensity of lighting (switch, dimmer, remote control, ...). The remote control allows the User to set many lighting modes, switching colours, dimming. One controller can control more blinds.

Variants with LED illumination require preparing an appropriate wiring.
Roller blinds for R-Lite roof windows are attractive fabric interior roller blinds recommended for all types of roof windows.

A high-quality construction with aluminium leading bars combined with a suitably selected fabric ensures fluent regulation of light. You can select fabrics with or without patterns with the fully shading effect of fabric that partially penetrates the light.

The roller blinds for roof windows in children’s rooms can be fitted with fabrics with various cheery motifs designed especially for children. Some types of fabrics are available with special fireproof treatment. For roller blinds for high roof windows, a control bar can be used for your ease of use.
Advantages and benefits

- Fabric roller blinds suitable for all types of skylights,
- rail from anodized aluminium or in white color
- aluminium guide rails prevent passing of light through sides,
- wide range of fabrics,
- easy control using rods for less accessible windows.

Control

- control bar
- handle

Installation options

The roller blind Rollite is mounted directly on the case-ment of the skylight.

Are you looking for elegant interior shading? Then the HR8-ZIP screen blind will be the perfect choice for you. This blind has a unique rail system that keeps the fabric perfectly stretched and in place in the rails.

The space between the box, the guide rails and the fabric is completely closed. The ZIP system used is unique thanks to the hidden stainless steel spring in the guide rail. The spring does not wear out, so the fabric retains tension for many years. With this roller shutter you can shade an area of up to 18 m² with one piece of a roller shutter. The blind is designed for the interior, a box of sizes 70, 90, 110 and 150 mm and blackout type of interior fabrics designed for both screen blinds and interior blinds can be used.

IsotRA was founded in Bolačice in 1992 by Erich Stavař and Bohumír Blachut. The initial business of the company focused on wholesale of window seals including installation. This is how the company IsotRA was created. ISO from the word “isolation” and TRA from “trade”. In 1993 the increasing demand for blinds lead to expansion of the business activities of IsotRA, first by the installation of blinds and subsequently their production. The continuous effort to improve products and services was the reason for commencement of production of own blind components and other shading products in 1995.

IsotRA Quality

Quality, reliability, customer care, research, development, technologies and innovations with respect to energy savings are the key values for IsotRA. The company aims to give the customer a clearly identifiable product of expected quality and technological level. Company IsotRA holds a quality certificate ČSN EN ISO 9001:2009, employs over 400 employees and exports its products to more than 30 countries worldwide.

MORE THAN 25 YEARS ON THE MARKET

More than a quarter of a year’s market presence is a significant jubilee for the company and gives a clear signal to our customers and business partners. IsotRA is a guarantee of reliability, expertise, innovation and tradition all in one company. The company’s corporate communication and logo were changed with respect to this milestone.

The new logo was redesigned with emphasis on clarity and easy distinguishing in the competitive market. An unmistakable brand emerged the red base of which represents the dynamics IsotRA has been developing for more than a quarter of a century with.
