

# INSECT SCREENS

## 1. TYPES

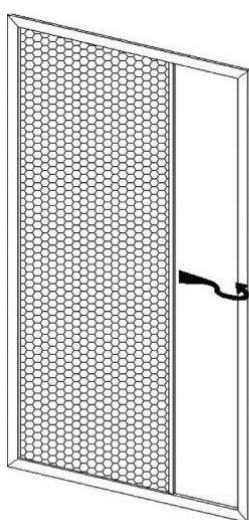

Roll screens

Type F10

Firm screens

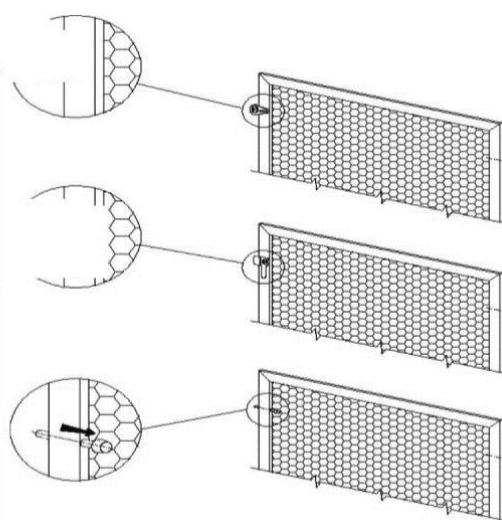

Type G10

Type E

Type C

Type D,I

### DESCRIPTION OF THE CONTROL FOR THE ROLL SCREEN:

Vertical roll (door) screen G10: The screen is lifted or lowered by drawing the handle.

Horizontal roll (window) screen F10: The screen is lifted or lowered by drawing the cord. Draw up to the point where the screen clicks in the end position or draw the lower profile with your hand. The brake automatically ensures slow running of the screen in the upward direction.

## 2. MAINTENANCE

The product does not require any extraordinary maintenance. Wipe the aluminium profiles with a duster or wet soft textile fabric or sponge. Only use soap solutions without chemical ingredients at a temperature of up to 30°C.

Do not use aggressive detergents, such as organic solvents, cleaning sand, cleaning pastes, developing steams and strong alkali cleaning detergents. In the case of dirtying the screen (dust), and to prevent damage to the screen, regularly use a fine brush or slightly adjusted manual vacuum cleaner.

**NOTIFICATION:**

Ensure careful cleaning of textiles to prevent jamming or other damage.

To prevent damage to the screen while cleaning, dismantle the product from the window (for roll screens, unroll it).

Protect the product against dirtying during reconstruction and painting.

### 3. SAFETY INSTRUCTIONS

In terms of security, the window screen does not serve as a barrier against falling through the window!

- Do not use force when handling the product if any obstacle prevents its motion.
- Do not suspend any items on the product (particularly the frame and the screen).
- Prevent mechanical stress and damage to the product.
- Items should not be suspended on the control cord of the roll screen or the door screen handle.
- Handle the product carefully, especially during cleaning.

**NOTES:**

- If the product is not functional, contact the seller or the firm which assembled the product.
- The display of the product may slightly differ from the actual version. The producer reserves the right to make changes.
- After the termination of the service life, do not dispose of in communal waste. Materials used can be separated and handed over in accordance with the valid regulations on waste and environmental protection. Information on waste collection points can be obtained from the local administration office.
