# EXTERIOR BLINDS

CETTA, SETTA, ZETTA, TITAN

Exterior blinds create an optimal environment regarding light and temperature conditions and are an important part of the building in terms of energy savings.

Within the traditional approach, the exterior blinds fulfil the shading and safety function.

As for the non-traditional concept, they represent an architectural element of office buildings and are a jewel of family houses.

## ADVANTAGES AND BENEFITS OF EXTERIOR BLINDS

HIGH DEGREE OF PROTECTION AGAINST SOLAR RADIATION,

EFFECTIVE PROTECTION OF PRIVACY,

REDUCTION OF HEAT ALREADY IN THE EXTERIOR,

REDUCTION OF THE AMBIENT NOISE LEVEL,

CORNER BLIND POSSIBILITY,

INCREASING THE SAFETY OF BUILDINGS,

DESIGN AND ARCHITECTURAL ELEMENT OF THE FACADE.

# BLINDS CETTA

*... practical variations.*

The exterior blind Cetta is a favorite type for shading family houses and office buildings. We offer this type in many design versions. Flexi system or Slim system features a lower lap height while the Duo system is characterized by different tilting of slats in the top and bottom blind part.

Aluminium guidance channels provide stability of the blind under windy conditions and serve as a supporting element for securing the house against burglary. A variability of assembly as well as design makes this exterior horizontal blind a practical shielding element suitable for all types of objects.

Standard dimensions:

	WIDTH [mm]		HEIGHT [mm]	SURFACE [m <sup>2</sup> ]			GUIDANCE ELEMENT
	min.	max.	max.	cord	handle	motor	
CETTA 50	400/600*	3 500	3 000	6	8	10	wire/guiding channel
CETTA 60 FLEXI	600	4 000	4 000	-	8	16	wire/guiding channel
CETTA 65	600	6 000	4 000	-	8	24	wire/guiding channel
CETTA 80 CETTA 80 - SLIM	600	6 000	4 000	-	8	24	wire/guiding channel
CETTA 80 FLEXI	600	4 000	4 000	-	8	16	wire/guiding channel
CETTA 80 FLEXI (CORNER BLIND)	600	3 000	4 000	-	7,5	12	wire/guiding channel
CETTA 100 FLEXI	600	4 000	4 000	-	8	16	wire/guiding channel

\* Min. width for electric control

# BLINDS SETTA

*... combination of elegance and practicality.*

The exterior blind Setta is a leader in exterior shading with regard to efficiency and design. S-shaped slats create a perfect compact surface when closed. Effectiveness of the exterior blind Setta is strengthened by its graceful appearance.

The thermoregulatory effect of the blind Setta is enhanced by a rubber piece pressed-in along the whole slat length. Aluminium guidance channels provide stability of the outside blind under windy conditions and serve as a supporting element for securing the house against burglary. A variability of assembly, elegance and perfect shading make this exterior horizontal blind a unique shielding element suitable for all types of objects.

Standard dimensions:							
	WIDTH [mm]		HEIGHT [mm]	SURFACE [m <sup>2</sup> ]			GUIDANCE ELEMENT
	min.	max.	max.	cord	handle	motor	
SETTA 65	600	6 000	4 000	-	8	24	guiding channel
SETTA 90	600	6 000	4 000	-	8	24	guiding channel

## Advantages of the Setta blind

- Elegant design with S-shaped slats,
- dual width of slats: 65 mm and 90 mm,
- high degree of shading,
- thermoregulatory as well as protective effect,
- reduction of the ambient noise level,
- bottom rail from extruded aluminium,
- possibility of electrical control,
- reduced blind noise (rubber piece pressed-in along the whole blind length),
- maximum surface guaranteed: 24 m<sup>2</sup>.

# BLINDS ZETTA

*... passion for modern design.*

The exterior blind Zetta is the most technologically advanced exterior blind suitable for shading family houses as well as office buildings. Z-shaped slats ensure perfect shading and have a modern feel.

The thermoregulatory effect of the blind Zetta is enhanced by a rubber piece pressed-in along the whole slat length. Aluminium guidance channels provide stability of the outside blind under windy conditions and serve as a supporting element for securing the house against burglary. A variability of assembly, elegance and perfect shading make this exterior horizontal blind a unique shielding element suitable for all types of objects.

Standard dimensions:							
	WIDTH [mm]		HEIGHT [mm]	SURFACE [m <sup>2</sup> ]			GUIDANCE ELEMENT
	min.	max.	max.	cord	handle	motor

# CHAIN BLIND TITAN

*... practical variations.*

TITAN 90 is the absolute top product among the exterior blinds. The chain blind TITAN 90 is the exterior blind with safety elements which protects the facility from violent intrusion. The whole system including the slat shape was newly developed by the ISOTRA development workplace.

All control and safety elements are not freely accessible (they are hidden in the guiding rails), which means that in the activated and enclosed state it prevents the blind handling from outsider. The new special shape of the slat results in the slat inter-locking in enclosed state without leaving any gaps. This type of slat is controlled only by motor. If the blind hits an obstacle during the downwards movement, the rest of the rolled blind remains in the obstacle position even after removing the obstacle (no free fall), and it also prevents manual handling of the blind upwards.

Standard dimensions:						
	WIDTH [mm]		HEIGHT [mm]		AREA [m <sup>2</sup> ]	GUIDANCE
	min.	max.	min.	max.	engine	
TITAN 90	600	2 800	500	4 000	8	Side guiding

## Advantages and benefits

- High level of resistance to violent intrusion,
- high level of wind resistance,
- self-supporting blind,
- blinds using independent system for lifting and tilting of slats,
- packet stopping in contact with any obstacle and the rest of the rolled blind remains in the obstacle position even after removing the obstacle, no free fall,
- easy and quick replacement of damaged slats,
- own technologies, including component production and rolling mills,
- modern design.

# CETTA 80F TE BLINDS

*...asymmetrical and efficient design.*

The sloped blind is an ideal solution for shading asymmetrical window shapes, where the upper frame is not horizontal, but inclined at a specific angle. The aluminium slats follow the angle of the upper frame and are parallel to it.

The slats are guided in a steel cord. The blind contains a special mechanism compensating for the different lengths of textile straps when sliding down and lifting the blind. The telescopic bottom rail compensates for the different width of the lower rail in the lower position (window width) and the upper position (length of the inclined part of the window). Low roll height is achieved by using slats without longitudinal folds (Flexi system).

Standard dimensions:						
	WIDTH [mm]		HEIGHT [mm]		AREA [m <sup>2</sup> ]	MAX. ANGLE
	min.	max.	min.	max.		
CETTA 80F TE	600	2 500	300	4 000	7	50°

## Advantages of the C80F TE sloped blind

- solution for atypical window shapes
- slat winding at an angle up to the window frame
- low weight of the roll

## Controls

- electric
- remote control or power switch

## Slat colours

# CORNER BLIND

*...unobstructed view of the landscape.*

The Corner exterior blind in a coupled design is the best solution for shading corner portals of houses and buildings.

Among other things, this product solves the problem of shading corner windows without a guide rail remaining in the centre and disturbing the overall view from the interior to the outside after the blind has been pulled up. The slats are connected by a stainless-steel ball chain in a plastic guide. The lower slat profiles are connected with a metal angle piece inserted in a plastic corner. The corner blind can be used for both inner and outer corners, but for a 90° angle only!

Standard dimensions:					
CORNER BLIND	WIDTH [mm]		HEIGHT [mm]		AREA [m <sup>2</sup> ]
	min.	max.	min.	max.	motor
WITHOUT MOTOR	600	3 000	500	4 000	7,5
WITH MOTOR	600	3 000	500	4 000	12

## Advantages of the CORNER blind

- shading of large corner windows
- no central guide rail
- undisturbed view of the landscape
- one motor for both blinds
- use for both inner and outer corners
- low roll height
- choice of two types of slats

## Controls

- electric
- remote control or power switch

## Intended for the following slats

- Cetta 80 Flexi
- Zetta 90

# VIVA SELF-SUPPORTING BLIND

*...aesthetics and functionality.*

The basic elements of the self-supporting blinds are guide rails, on which the entire weight of the armour lies. All types and sizes of slats can be used for this self-supporting blind, except for Cetta 50. An insect screen can also be integrated into them.

The upper profile of the VIVA blind, including the entire slat package, is placed in a pre-assembled box, which has an angular design. The box can be made in two variants – under-plaster or exposed. The under-plaster variant means that the box is “hidden” under the façade, and when the blind is fully retracted into the box, the blind is not visible at all. This design option must be taken into account already during the implementation of the house construction. In the under-plaster version, the VIVA blind box can be provided with 10 mm thick hardened polystyrene at both the front and the back. The box is visible in case of the exposed version.

Standard dimensions:				
VIVA	WIDTH [mm]		HEIGHT [mm]	AREA [m <sup>2</sup> ]
	min.	max.	min.	
WITHOUT INSECT SCREEN	600	4 000*	500	12
WITH INSECT SCREEN	720	1 800	500	3

\* NOTE: For blind widths exceeding 3500 mm, a reinforcing profile is added into the box.  
 Note: The max. height of the VIVA self-supporting blind with an insect screen is 2500 mm.

## Advantages of the VIVA self-supporting screen

- faster and easier assembly
- high level of shading
- thermoregulatory and protective effect
- decrease in the level of outside noise
- lower profile from the extruded aluminium
- electric control option
- reduced noise emitted by the blind

## Controls

- electric
- remote control or power switch

# BLINDS CETTA

## DESIGN VERSIONS

### SLIM SYSTEM

Design version of the blind Cetta 80

- Meets the low lap height requirement while maintaining the strength of slats.
- specific assembling of slats (side alternating overlap of adjacent slats) with maintaining the possibility of guiding by strips.
- convenient solution when facing a lack of space for the lap.

### DUO SYSTEM

Design version of the blind Cetta 65, Cetta 80 and Cetta 80-Flexi

- Allows splitting the blind into two parts with different slat tilting.
- provides a much greater variability of shading.
- recommended solution to office buildings, training rooms or conference halls.

### FLEXI SYSTEM

Design version of the blind Cetta 80

- Low lap height in comparison with the blind Cetta 80 achieved by using slats without the longitudinal bend.
- convenient solution when facing a lack of space for the lap.

# SELF-SUPPORTING BLINDS

## STS

- Self-supporting option for all type of External Venetian Blinds excluding Cetta 50.
- The maximum width for self-supporting blinds is 4 m. From 2.4 m to 4 m supplemented with a reinforcing profile.
- Installation on facade.
- STS CLASIC
- STS ALUMINIUM
- STS FIX

STS - DETAIL

## BRAVO

- Head-rail including slats comes integrated into rounded pelmet.
- Eccentric head-rail placing.
- Suitable for smaller spaces.
- Only motor control.

BRAVO

BRAVO - DETAIL

## WINDPROOF EXTERIOR BLIND WINDSTABIL

- Technological increase in the windscreen resistance parameter via additional strings,
- for exterior blinds Cetta 80 and Zetta 90,
- side line with the guide rail RS75 together with P018/2,
- max width 3 000 mm, max height 3 600 mm,
- max surface for engine drive: 9 m<sup>2</sup>,
- wind resistance class 5.

	Max. wind speed	38	28	19	11	5	1	km/h
	Max. effective height wing	2 500 mm						

Cetta 80 Flexi - wire	Essential characteristics	Performance (according to width of construction hole)						Standard
		Up to 2,0 m	2,0 - 2,5 m	2,5 - 3,0 m	3,0 - 3,4 m	3,4 - 3,8 m	3,8 - 4,0 m	
	Wind resistance	1/4	0/3	0/2	0/1	0/0	0/0	EN 13659/Beaufort
	Max. wind speed	28	19	11	5	1	1	km/h
	Max. effective height wing	4 000 mm						

Cetta 80 - channel	Essential characteristics	Performance (according to width of construction hole)								Standard
		Up to 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	4,0 - 4,5 m	4,5 - 5,0 m	5,0 - 5,5 m	5,5 - 5,8 m	5,8 - 6,0 m	
	Wind resistance	4/7	3/6	2/5	1/4	0/3	0/2	0/1	0/0	EN 13659/Beaufort
	Max. wind speed	61	49	38	28	19	11	5	1	km/h
	Max. effective height wing	4 000 mm								

Cetta 80 - wire	Essential characteristics	Performance (according to width of construction hole)							Standard
		Up to 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	4,0 - 4,5 m	4,5 - 4,8 m	4,8 - 5,0 m	5,0 - 6,0 m	
	Wind resistance	3/6	2/5	1/4	0/3	0/2	0/1	0/0	EN 13659/Beaufort
	Max. wind speed	49	38	28	19	11	5	1	km/h
	Max. effective height wing	2 500 mm							

Cetta 80 - wire	Essential characteristics	Performance (according to width of construction hole)							Standard
		Up to 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	4,0 - 4,5 m	4,5 - 4,8 m	4,8 - 5,0 m	5,0 - 6,0 m	
	Wind resistance	2/5	1/4	0/3	0/2	0/1	0/0	0/0	EN 13659/Beaufort
	Max. wind speed	38	28	19	11	5	1	0	km/h
	Max. effective height wing	4 000 mm							

Cetta 100 Flexi - wire	Essential characteristics	Performance (according to width of construction hole)						Standard
		Up to 0,8 m	0,8 - 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	4,0 - 4,5 m	4,5 - 4,8 m	
	Wind resistance	3/6	2/5	1/4	0/3	0/2	0/1	EN 13659/Beaufort
	Max. wind speed	49	38	28	19	11	5	km/h
	Max. effective height wing	2 500 mm						

Cetta 100 Flexi - wire	Essential characteristics	Performance (according to width of construction hole)						Standard
		Up to 0,8 m	0,8 - 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	4,0 - 4,5 m	4,5 - 4,8 m	
	Wind resistance	2/5	1/4	0/3	0/2	0/1	0/0	EN 13659/Beaufort
	Max. wind speed	38	28	19	11	5	1	km/h
	Max. effective height wing	4 000 mm						

Cetta 100 Flexi - channel	Essential characteristics	Performance (according to width of construction hole)				Standard
		Up to 1,0 m	1,0 - 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	
	Wind resistance	4/7	3/6	2/5	1/4	EN 13659/Beaufort
	Max. wind speed	61	49	38	28	km/h
	Max. effective height wing	2 500 mm				

Cetta 100 Flexi - channel	Essential characteristics	Performance (according to width of construction hole)				Standard
		4,0 - 4,5 m	4,5 - 5,0 m	5,0 - 5,5 m	5,5 - 6,0 m	
	Wind resistance	0/3	0/2	0/1	0/0	EN 13659/Beaufort
	Max. wind speed	19	11	5	1	km/h
	Max. effective height wing	4 000 mm				

Titan 90	Essential characteristics	Performance (according to width of construction hole)		Standard
		6/9		
	Wind resistance	6/9		EN 13659/Beaufort
	Max. wind speed	88		km/h

Cetta 80F TE	Essential characteristics	Performance (according to width of construction hole)		Standard
		Up to 2,0 m	2,0 - 2,5 m	
	Wind resistance	2/5	1/4	EN 13659/Beaufort
	Max. wind speed	38	28	km/h
	Max. effective height wing	2 500 mm		

Cetta 80F TE	Essential characteristics	Performance (according to width of construction hole)		Standard
		Up to 2,0 m	2,0 - 2,5 m	
	Wind resistance	1/4	0/3	EN 13659/Beaufort
	Max. wind speed	19	11	km/h
	Max. effective height wing	4 000 mm		

VIVA	Essential characteristics	Performance	
		class 3, 4	
	Wind resistance	class 3, 4	

Windstabil (Z90, C80)	Essential characteristics	Performance (according to width of construction hole)						Standard
		Up to 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	4,0 - 4,5 m	4,5 - 5,0 m	5,0 - 5,4 m	
	Wind resistance	5/8	4/7	3/6	2/5	1/4	0/3	EN 13659/Beaufort
	Max. wind speed	74	61	49	38	28	19	km/h
	Max. effective height wing	2 500 mm						

Windstabil (Z90, C80)	Essential characteristics	Performance (according to width of construction hole)						Standard
		Up to 2,0 m	2,0 - 3,0 m	3,0 - 4,0 m	4,0 - 4,5 m	4,5 - 5,0 m	5,0 - 5,4 m	
	Wind resistance	4/7	3/6	2/5	1/4	0/3	0/2	EN 13659/Beaufort
	Max. wind speed	61	49	38	28	19	11	km/h
	Max. effective height wing	4 000 mm
