ISOTRA *Quality*

A brand symbolizing years of tradition, innumerable investments into research and development, use of high-quality materials, technological advancement, reliable work of hundreds of employees and many more parameters, which together form one whole — the final product of company ISOTRA.

FABRIC ROLLER BLIND LARRA

... a touch of intimacy.

Home is a place where we want to feel safe and experience our intimate moments of privacy. The design of the roller blind Larra expresses these feelings with its naturally rounded and wavy shapes that we most often see in nature and modern architecture. Larra presents a timeless design that, combined with your chosen fabric, will make you feel comfortable in the interior and create a cozy atmosphere of your home.

Versatility of this roller blind lies in the option of five shapes of the lower slat and five options of the upper profile - attachment by means of brackets/holders, mounting brackets or a cover box.

The aesthetic look of the interior roller blind Larra from the ISOTRA workshop was created by Miroslavo. Miroslavo is a Czech designer, photographer and artist, known for his never-ending curiosity and feverish inventive imagination. He is the holder of several world awards for design and his work is exhibited all over the world.

FABRIC ROLLER BLIND VERRA

... a touch of intimacy.

Decorate your windows with various motifs, harmonise the interior with your favourite colour, experiment with light penetrating the semi-brightened fabric, or shade your windows in full.

Easy controlling and inspired design – the Verra is an ideal roller blind for plastic windows, Euro windows and other window types. You can choose from a large selection of fabrics: from simple colour tones to fabrics with luxurious patterns, from curtain cloths to black-out fabrics. Due to the high-quality manufacturing and wide selection of fabrics, the Verra roller blind will give your interior a specific charm.

Advantages and benefits

- Simple design,
- wide colour range of fabrics used,
- easy handling and assembly,
- possibility of choice of fabric day – night,
- bottom rail is possible to cover by fabric.

FABRIC ROLLER BLIND VERRA METAL

... a touch of intimacy.

A truly modern interior needs the Verra Metal! Due to its ability to shade very large areas (up to 17,5 m²), this roller blind is predestined to complete the architectural design of any interior – private areas as well as large administrative and exhibition buildings.

Thanks to its all-metal design, the Verra Metal will become a true jewel of any interior, fulfilling all requirements for shading – both aesthetic and functional. Steel cable guide system can be added to large dimensions. The variability of controls is an indisputable advantage of this roller blind – in addition to manual controls by a metal chain, we also offer motor-driven blind control system activated by a switch or a remote controller. Moreover, three sizes of the winding roller diameters allow expanding the standard selection of fabrics by the screen-type fabrics.

Advantages and benefits

- Modern design,
- wide colour range of fabrics used,
- easy handling and assembly,
- recommended for shading of large areas (up to 17,5 m²),
- variation with traditional, day-night fabric or screen fabric,
- possibility of side guidance by a wire,
- possibility of electric control,
- possibility of choice of fabric day – night,
- bottom rail is possible to cover by fabric.

FABRIC ROLLER BLIND VERRA SEMI

... a touch of intimacy.

The Verra semi roller blind with a cover rail elegantly conceals the supporting and control elements that will no longer interfere with your interior design. The classic version offers you a wide range of colours of the fabrics, from simple colour tones to fabrics with luxurious ornaments. Or you can select the modern day-night version.

The day-night version consists in breaking up the fabric into transparent and non-transparent stripes. By overlapping of the two layers of the fabric, the stripes cross-fade, thus allowing continuous regulation of the light intensity that enters the room. The day-night version uses special fabrics without ornaments, which do not interfere with the originality of the roller blind's stripe finish.

Advantages and benefits

- Modern design,
- supporting and control elements do not interfere with the interior design,
- wide range of colours of the fabrics,
- version with a classic fabric or with a day-night fabric,
- easy installation and handling.

FABRIC ROLLER BLIND ROLLITE

... a touch of intimacy.

The Interior roller blind Rollite represents an elegant and fully functional interior complement. This roller blind cover with a rounded cover profile made of anodized aluminium and lateral guidance bars ensures perfect shading.

You may select fully obscuring, patterned or uni-coloured fabric or a textile material transmitting light just partly. We also supply special textiles containing glass fibres which are particularly suitable for allergic persons as well as special fire-resistant fabrics.

Advantages and benefits

- Blind with an aluminium cover profile,
- aluminium guidance bars prevent the penetration of light at the sides,
- wide colour range of fabrics used,
- profiles and bars in six RAL colour shades.

Control

Installation options

The roller blind Rollite is mounted directly on the casement.

FABRIC ROLLER BLIND LUNA

... a touch of intimacy.

Would you like to integrate both functionality and design and have only the light that you actually need in a room? The Luna roller blind connects practicality and elegance. Its design with guiding channels on the sides ensures complete shading.

You can choose from a wide selection of fabrics for this roller blind, from simple colour tones to fabrics with luxurious patterns. Correct fabric selection will allow achieving various degrees of shading, from delicate light toning to full shading by black-out fabric types. The original appearance of the Luna roller blind can be supported by toning the blind with the window through decorating the rails into wood imitation. It full harmonises with the window frame, giving a pleasant and exclusive impression.

Advantages and benefits

- Roller blind with a cover profile in aluminium or plastic design,
- lateral guidance bars prevent the penetration of light at the sides,
- possibility of coating the profiles and bars with renolit in imitation of wood.

FABRIC ROLLER BLIND NEMO

... a touch of intimacy.

The fabric roller blind Nemo offers you a smooth control together with impressive decoration of your interior. Nemo is a novelty among roller blinds. Its originality consists in the horizontal division of fabric into transparent and non-transparent stripes that alternate periodically. Overlapping of two fabric layers leads to stripe blending and thus to a gradual light transmitting.

From a design perspective, the roller blind in its day-night version provides an unprecedented appearance suited to the classical as well as modern interior. Nemo roller blinds can be mounted onto the wall, into the ceiling or, without any drilling, on the casement.

Roller blind without a cover profile Classic / day-night	WIDTH [mm]		HEIGHT [mm]	MAXIMUM SURFACE GUARANTEED [m ²]

SKYLIGHT ROLLER BLIND R-LITE

... a touch of intimacy.

Roller blinds for R-Lite roof windows are attractive fabric interior roller blinds recommended for all types of roof windows.

A high-quality construction with aluminium leading bars combined with a suitably selected fabric ensures fluent regulation of light. You can select fabrics with or without patterns with the fully shading effect of fabric that partially penetrates the light.

The roller blinds for roof windows in children's rooms can be fitted with fabrics with various cheery motifs designed especially for children. Some types of fabrics are available with special fireproof treatment. For roller blinds for high roof windows, a control bar can be used for your ease of use.

Advantages and benefits

- Fabric roller blinds suitable for all types of skylights,
- rail from anodized aluminium or in white color
- aluminium guide rails prevent passing of light through sides,
- wide range of fabrics,
- easy control using rods for less accessible windows.

ABOUT US

HISTORY

In 1992, two brothers-in-law, Bohumír Blachut and Erich Stavař, decided to set up their own business in their home village of Bolatice near Opava. They started in a garage, establishing a company they named ISOTRA. ISO came from the word for insulation and TRA from trade, as they were originally involved in the trade and installation of window sealing. Much has changed since then, but the company's identity remains

the same. In 1993, they started dealing in the current product line – window blinds. Always seeking to improve their products, and reacting to the current market demand, they decided, in 1995, to start production of their own blinds and components, with continuous expansion of the shading product line.

DIRECTION OF DEVELOPMENT

What sets ISOTRA apart from its competition is primarily the fact that the company is able to develop a completely new, customised product from A to Z. This comprises designing, manufacture of the individual components, testing and certification of the new product, setting up the technological processes, developing new machinery, and supplying

the complete technology. The company holds patents for a number of things, at high standards of excellence. The technologies, production processes, as well as research and development in solar shading make ISOTRA one of the leading producers of sun-shading products and a technological leader not only in the Czech Republic.

MANUFACTURING PROGRAMME

ISOTRA has its own R&D department, a design office, technologies, a state-of-the-art tool shop, a new powder coating shop, a press shop for thermoplastic materials, and extensive production facilities. The company offers a comprehensive product range, including the product groups of interior and exterior blinds, fabric roller blinds, pleated blinds, Japanese walls, exterior roller blinds, insect screens, awnings, screen roller blinds,

verandas, and ARTOSI bioclimatic pergolas. The production of components, profiling machines, cutting tools, and technological units for the manufacture of the blinds is an inseparable part of the manufacturing programme. Technological maturity of the company is documented by the possession of several worldwide patents and utility models for the technical solutions in the area of shading technology.

ISOTRA QUALITY

Quality, reliability, customer care, research, development, technologies and innovations with respect to energy savings – these are ISOTRA's fundamental values. The company pursues the objective of providing the customers with branded, clearly identifiable, technologically advanced

products of corresponding quality. ISOTRA a. s. holds the certificates of quality in accordance with the Czech standards ČSN EN ISO 9001:2009 and ČSN EN ISO 14001:2005, employs more than 600 employees, and exports its product to more than 46 countries worldwide.

30 YEARS WITH YOU

Thirty years of ISOTRA on both the domestic and international markets is proof of constant growth, innovations, reliability, expertise, and tradition. ISOTRA has remained a solely Czech company that keeps expanding. The establishment of subsidiaries in Germany and Poland is indis-

putable evidence of this fact. The brand is currently being reinforced by expanding the Partner network in the Czech Republic, Slovakia, as well as further abroad. The red background of the ISOTRA logo depicts the dynamics with which ISOTRA has been evolving over the last 30 years.
